

SAP BusinessObjects Hosted Platform

Test and experience the BI tools on SAP BusinessObjects

At a glance:

Nowadays companies are focusing on standardization in order to get the complexities and costs of their information technology under control

A detailed analysis of the business intelligence (BI) tools available in the market is indispensable when making a choice for the appropriate business intelligence platform

The integration into the existing and mostly complex system landscape bears risks and hidden costs, which can be avoided with the selection of the appropriate platform. This involves carrying out complex and expensive Proof of Concepts (PoC).

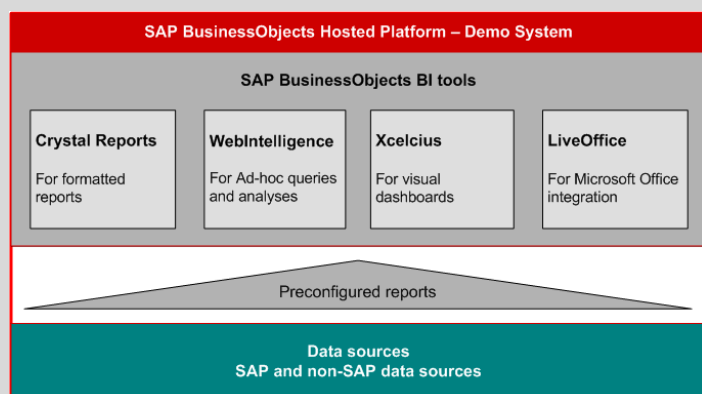

The lack of resources, time and suitable hardware environment usually does not lead to desired results required for a valid decision-making

D1 Solutions and **Fujitsu Services** provides you a unique offer in this difficult situation

Testing SAP BusinessObjects in a live demo environment

D1 Solutions and Fujitsu Services, system integration partners of SAP, offers you the possibility to get to know the possibilities of SAP BusinessObjects environment better and to test the BI tools *Crystal Reports*, *WebIntelligence*, *Xcelsius* and *LiveOffice* in a secured demo environment.

Our live demo environment offer includes the following:

- Documentation of the demo environment
- Initial ½ day support and additional ½ day review as well as response to open queries by experts
- Support by D1 Solutions and Fujitsu Services experts over E-mail during the entire runtime
- 30 days use without backup
- One-time reset of demo environment

Content of demo scenarios:

- Integration scenarios for reporting (SAP BW and non-SAP data sources)
- Test data include ca. 1 million records with focus on:
 - Cost centre accounting
 - Income statement
 - Planning

Technical management:

- Remote access on 2 Servers (SAP & BusinessObjects) using PPTP connection (2 concurrent Windows users)
- Client tools installed on servers. Access to WebIntelligence also possible via InfoView.
- Access possible via locally installed client tools (BO XI 3.1, no “client” VM is supplied)

SAP BusinessObjects Hosted Platform

Test and experience the BI tools on SAP BusinessObjects

Your advantages:

Availability	Powerful SAP BusinessObjects BI tools will be readily available and can be tested directly using SAP data. Preconfigured demo reports and dashboards that were created using the BI tools facilitate your entry into the SAP BusinessObjects world.
Completeness	Complete integration scenarios for formatted reporting, ad-hoc analyses, dashboards and MS Office report integration can be tested over the SAP BusinessObjects hosted platform
Simplicity	All SAP BusinessObjects BI tools will be at your disposal immediately after your decision to use the hosted platform. No configuration and waiting required for user data – you can simply work with the readily available test data.

Your benefits include:

- Technical verification possibilities
 - BusinessObjects front-end tools
 - SAP & BusinessObjects data integration and reporting/analysis
 - Combination of SAP and non-SAP data
 - Benchmarking of BusinessObjects front-end tools
- Risk-free, technical verification on an encapsulated and pre-configured system
- Technical concept testing
- User-friendliness testing

Your partner:

D1 Solutions focuses on premium business intelligence services and is a leading partner of BusinessObjects, an SAP company, as well as *BusinessObjects Authorized Education Partner*.

Fujitsu Services is the European IT-services company of Fujitsu group and ranks among the leading IT-service providers in Europe, Middle East and Africa with a yearly turnover of 3.6 billion Euros. Fujitsu Services employs around 50 employees in Switzerland.

Cost = CHF 5'900 for 30 days plus VAT

After the expiration of 30 test days, you have the following options:

Option A – Extended Proof of Concept (PoC)

You may like to study the application of SAP BusinessObjects tools further, especially to work with your company data. D1 Solutions and Fujitsu Services will support you to carry out an extended PoC.

Option B – Deletion of demo environment

Your personal demo environment will be disabled and deleted.
